EDUCATION

K.J. Somaiya School of Engineering , Vidyavihar
Bachelors of Technology in Computer Engineering
Relevant Coursework : Web Development, Data Structures, Algorithms, Data Science & Analytics, DBMS, Op. Systems

Nov 2022 - June 2026

EXPERIENCE

Associate SDE (IT-Product) | Edelweiss Life Insurance, Mumbai

July 2026 - Present

- Onboarded as a full-stack .NET engineer, configuring development environments and agile workflows
- Currently working on full-stack platforms like CMSs using C#, .NET, MVC, CRUD, REST APIs and RBAC

SWE Intern | 1 Play Global, Remote

May 2025 -July 2025

- Tasked with building a high-performance, visually complex global platform from scratch, developed and hosted the entire website using Next.js, React, TailWind, ShadCN, Chart.js, Three.js and TypeScript, ensuring 100% SEO & 90+ accessibility scores via Lighthouse
- To manage infrastructure for scaling features, collaborated with cross-functional teams, building and deploying 4+ sub-sections via Docker & Google Cloud Run

SWE Intern | MeshCraft, Remote

Dec 2024 - Apr 2025

- Inherited a legacy 3D interface with poor performance and navigation, revitalized a five-page interactive 3D website using the MERN Stack as part of a 12-member team, contributing to a perfect 100 Lighthouse score in Best Practices and 90+ in SEO
- To handle growing asset volumes without backend lag, crafted a Marketplace page with 10+ 3D assets & respective pages, implementing local storage for filters

SWE Intern | NPCIL, Mumbai

May 2024 - July 2024

- Designed a Python GUI to monitor 10+ system metrics, reducing diagnostic time by 30% using PyQt and SQLite
- Presented real-time resource analysis, boosting system transparency, control, and code efficiency by 25%

Investment Banking | Marquee Equity, Remote

Mar 2024 - Apr 2025

- Completed 20+ corporate training sessions on financial modeling and deal structuring
- Wrote 10+ research reports on recently concluded funding transactions in MLA Format

OPEN SOURCE

OrchardCore | Pull Request Link (#19348) | Status: Merged

June 2026

- Resolved admin menu active state bugs by normalizing multi-tenant URL prefixes; eliminated stale navigation hash fallbacks for SaaS environments, yielding 92 lines of functionally tested C# and .NET code

Squidex | Pull Request Link (#1323) | Status: Merged

Jun 2026 -July 2026

- Added shared EF OpenIddict regression coverage generated across SQL providers to verify token row saving without application reference, thus fixing the login after setup, yielding 51 lines of functionally tested C# & .NET code

PROJECTS

StakeLiGames | Hosted Link | GitHub Repo

Nov 2025 - Apr 2026

- Launched a full-stack on-chain staking dApp (Next.js 16, TypeScript, Tailwind, Framer Motion, Solidity, ethers.js, Python) for 8 LinkedIn Games on Sepolia, featuring USDC ERC20 staking, replay-protected attestation, up to 15–30% rewards and +10% flawless bonuses, MetaMask auto-switch and 7 Product Hunt upvotes
- Built the backend with py-solc-x Solidity compilation, Next.js API attestation, Chart.js analytics, multi-contract history aggregation, live OS-adaptive theme + display and Vercel deployment, achieving 100 in Performance / SEO / Best Practices and 92 in Accessibility on Lighthouse

ScholarBridge | Report Link | GitHub Repo

Jul 2025 - Nov 2025

- Worked on a full-stack scholarship platform (React, Vite, Tailwind, Node.js, Express, PostgreSQL) in a group of 4, with Role-Based Access Control (RBAC), enabling student applications, trust/NGO onboarding, JWT authentication & Cloudflare R2 document workflows, with smart filtering so trusts view only relevant applicants

- Implemented a **scalable multi-trust** approval system with **auto-close** funding logic, **1** application **per** student, secure **password** and **profile management**, role-based **dashboards** and robust **document handling**, delivering a transparent, modern **UI** and efficient application processing for all stakeholders

Bank Customer Churn Prediction | [Hosted Link](#) | [GitHub Repo](#)

June 2025 - Mar 2026

- Full-stack project with over **375+** unique views, analyzing **4000** customer records using **Python**, **Supabase**, **JSON** & **EmailJS**, with peak model accuracy in **XGBoost (84.25%)**, utilizing **SMOTE** for class balance & performance
- Deployed advanced feature engineering pipeline with domain logic for **GPT OSS 120B LLM**, enabling personalized churn insights, visual dashboards & auto-drafted retention emails for banks, hosted on **Streamlit** with **HTML**, **CSS**, **JS**

SimulateRecruitAI - Mock Interview Platform | [Hosted Link](#) | [GitHub Repo](#)

Apr 2025 - Mar 2026

- Built a full-stack **SaaS** platform (**Next.js**, **Radix UI**, **Gemini AI**, **NeonDB**, **Clerk**, **JSON**) supporting **50+** job roles with **JWT** & **Google**, **MetaMask** authentication enabled, real-time mock interviews and question generation
- Engineered and deployed a fully **Dockerized** web app with **Stripe** billing on **Vercel**, optimizing Lighthouse scores to **94+** (**100** in **SEO** & **Best Practices**) through SSR and code-splitting, achieving **~90** sign-ups on the platform

Personal Portfolio | [Hosted Link](#) | [GitHub Repo](#) | **React.js + Three.js + TailWind + Python**

Sep 2024 - Present

- Attracted **1000+** views & **200+** unique visitors from **5+** countries within **10** days across **10+** browsers, built with **React**, **Three.js**, **Framer Motion**, **Python** and **Vite**, featuring **3D** models, dual-mode **UI** with OS-level theme auto-detection and display, live system syncing, GitHub's official heatmap palette and responsive layouts
- Optimized performance with **90+** scores across **4** Lighthouse parameters, with **sessionStorage** cache-safe toggling, domain-grouped skill grids, neon-green hover micro-transitions, dual-mode assets and **Vercel CI/CD**

SKILLS

- **Languages & Frameworks** : Python, C#, C++, TypeScript, JavaScript, PHP, .NET, Next.js, MERN Stack, Streamlit
- **UI & Visualization** : HTML, CSS, Bootstrap, Tailwind CSS, ShadCN, Radix, Three.js, Chart.js, Plotly, Matplotlib, SciPy
- **Tools & Platforms** : Git, GitHub, Postman, Vim, Vercel, AWS, GCP, Babel, Docker, Kafka, Redis, Pillow, SciKit-Learn
- **AI & Databases** : Machine Learning, Artificial Intelligence, NumPy, Pandas, MySQL, PostgreSQL, Supabase, SQLite

ACHIEVEMENTS

- Earned a **top 3% Finalist** spot at TechGig **Code Gladiators 2024** (DSA solutions in **C++/Python**)
- Achieved the **Standard Milestone** in **Google Cloud Arcade '24** (**25+** badges, **15+** Arcade points)
- Ranked in **top 4%** of **~36000 Codolio** users, with **780+** C-Score, **480+** problems solved & **2700+** **GitHub** contributions
- Got joint rank **1st** out of **47** participants in **Coffee With CodeCell '25** coding contest, solving all **7** problems using **C++**
- Got **3rd** place in the **National Mathematics Day Quiz** by **Emfinity KJSCE**, scoring **70%** marks in the **10**-question event

CERTIFICATIONS

- **Sequence Models** | **~37 hours** | [Certificate Link](#)

Apr 2026 - Apr 2026
- Algorithms for **DNA Sequencing** | **~12 hours** | [Certificate Link](#)

Apr 2026 - Apr 2026
- **Object-Oriented** Data Structures in **C++** | **~21 hours** | [Certificate Link](#)

July 2024 - Aug 2024
