EDUCATION

K.J. Somaiya School of Engineering , Vidyavihar **Nov 2022 - Jun 2026**
Bachelors of Technology in Computer Engineering
with Honours in Data Science & Analytics
Relevant Coursework : Web Development, Data Structures, Algorithms, DBMS, Artificial Intelligence

EXPERIENCE

Associate SDE (IT-Product) | Edelweiss Life Insurance, *Mumbai* **Jul 2026 - Present**

• Onboarded as a full-stack **.NET** engineer, configuring development environments and agile workflows
• Working on platforms like CMSs and Customer Portals using **C#, .NET, MVC, CRUD** and **REST APIs**

SWE Intern | 1 Play Global, *Remote* **May 2025 -Jul 2025**

• Tasked with building a high-performance, visually complex global platform from scratch, developed and hosted the entire website using **Next.js, React.js, TailWind, ShadCN, Chart.js, Three.js** and **TypeScript,** ensuring **100% SEO** & **90+** accessibility scores via Lighthouse
• To manage infrastructure for scaling features, collaborated with cross-functional teams, building and deploying **4+** sub-sections via **Docker** & **Google Cloud Run**

SWE Intern | MeshCraft, *Remote* **Dec 2024 - Apr 2025**

• Inherited a legacy 3D interface with poor performance and navigation, revitalized a **five**-page interactive **3D** website using the **MERN** Stack as part of a **12**-member team, contributing to a perfect **100** Lighthouse score in **Best Practices** and **90+** in **SEO**
• To handle growing asset volumes without backend lag, crafted a Marketplace page with **10+ 3D** assets & respective pages, implementing local storage for filters

---

SWE Intern | Nuclear Power Corporation of India Ltd., *Mumbai* **May 2024 - Jul 2024**

• Designed a **PyQt + SQLite GUI** to monitor **10+** system metrics, thus reducing diagnostic time by **30%**
• Presented real-time resource analysis, hence boosting transparency, control & code efficiency by **25%**

Investment Banking | Marquee Equity, *Remote* **Mar 2024 - Apr 2025**

• Completed **20+** corporate training sessions on **financial modeling** and **deal structuring**
• Wrote **10+** research reports on recently concluded funding transactions in **MLA Format**

OPEN SOURCE

OrchardCore | Pull Request #19348 | Status: **Merged** | **8000+** stars, **2500+** forks **Jun 2026**

• Resolved admin menu active state bugs by normalizing multi-tenant **URL** prefixes; eliminated stale navigation hash fallbacks for **SaaS** environments via **92** lines of functionally tested **C#** and **.NET** code

---

Squidex | Pull Request #1323 | Status: **Merged** | **2500+** stars, **500+** forks **Jun 2026 - Jul 2026**

• Added shared **EF OpenIddict** regression coverage generated across **SQL** providers to verify token row saving without application reference, fixing login after setup via **51** lines of tested **C#** & **.NET** code

PROJECTS

Personal Portfolio | Hosted Link | GitHub Repo | **React + Three.js + TailWind** **Sep 2024 - Present**

• Attracted **1000+** views & **200+** unique visitors from **5+** countries within **10** days across **10+** browsers, built with **React, Three.js, Framer Motion** and **Vite**, featuring **3D** models, dual-mode **UI** with OS-level theme auto-detection and display, live system syncing, GitHub heatmap palette & responsive layouts

• Optimized performance with **90+** scores across **3** Lighthouse parameters, with **sessionStorage** cache-safe theme toggling, neon-green hover micro-transitions, dual-mode assets and **Vercel CI-CD**

SimulateRecruitAI - Mock Interview Platform | Hosted Link | GitHub Repo **Apr 2025 - Jun 2026**

• Built a full-stack AI interview mocker (**Next.js, TailWind, Gemini AI, NeonDB, Clerk**) supporting **50+** job roles, with **Google** & **MetaMask** auth enabled alongside custom API routes, real-time mock interviews & question generation
• Engineered and deployed a web app with **Stripe** billing + webhooks on **Vercel**, optimizing Lighthouse scores to **96+** (**100** in **SEO** & **Best Practices**) through SSR and code-splitting, achieving **95+** sign-ups

---

StakeLiGames | Hosted Link | GitHub Repo **Nov 2025 - Jun 2026**

• Launched an on-chain staking **dApp** (**Next.js 16, TypeScript, Tailwind, Framer Motion, Solidity, ethers.js, Python**) for **8 LinkedIn Games** on **Sepolia**, featuring **USDC ERC20** staking, replay-protected attestation, up to **15–30%** rewards and **+10%** flawless bonuses, with **MetaMask** network auto-switch

• Built the backend with **py-solc-x** Solidity compilation, Next.js **API** attestation, **Chart.js** analytics, multi-contract history aggregation, live OS-adaptive theme + display and **Vercel** deployment, achieving **100** in **SEO** & **Best Practices** and **99** in **Performance** on **Lighthouse**

Bank Customer Churn Prediction | Hosted Link | GitHub Repo **Jun 2025 - Mar 2026**

• Full-stack project with over **390+** unique viewers, analyzing **4000** customer records using **Python**, **Supabase**,**JSON** & **EmailJS**, hosted on **Streamlit** with **HTML, CSS** and **JavaScript,** with peak model accuracy in **XGBoost (84.25%),** utilizing **SMOTE** for class balancing & performance tuning

• Deployed advanced feature engineering pipeline with domain logic for **GPT OSS 120B LLM** , enabling personalized churn insights, visual dashboards & auto-drafted retention emails for banks

---

ScholarBridge | Report Link | GitHub Repo **Jul 2025 - Nov 2025**

• Worked on a full-stack scholarship platform (**React, Vite, Tailwind, Node.js, Express, PostgreSQL**) in a group of **4**, with Role-Based Access Control (**RBAC**), enabling student applications, trust/NGO onboarding, **JWT** authentication & **Cloudflare R2** document workflows, with smart filtering enabled

• Implemented a **scalable multi-trust** approval system with **auto-close** funding logic, **1** application **per** student, secure **password** and **profile management**, role-based **dashboards** and robust **document handling**, delivering a transparent, modern **UI** and efficient application processing for all stakeholders

SKILLS

• **Languages & Frameworks :** Python, C#, C++, TypeScript, JavaScript, .NET, Next.js, MERN, Streamlit
• **UI & Visualization :** HTML, CSS, TailWind, ShadCN, Radix, Three.js, Chart.js, Plotly, Matplotlib, SciPy
• **Tools & Platforms :** Git, GitHub, Postman, Vim, Vercel, AWS, GCP, Babel, Docker, SciKit-Learn, Pillow
• **AI & Databases :** Machine Learning, Artificial Intelligence, NumPy, Pandas, Pillow, Postgres, Supabase

ACHIEVEMENTS

• Earned a **top 3% Finalist** spot at TechGig **Code Gladiators 2024**, solving DSA questions in **C++/Python**
• Obtained **Expert** badge on **Matiks**, earning ratings of **1600+** in **Math** & **Logic** and a streak of **35+** days
• Achieved the **Standard Milestone** in **Google Cloud Arcade '24** (**25+** badges, **15+** Arcade points)
• Solved **480+** DSA problems across different platforms and made **2700+ GitHub** contributions
• Got **1st** place in the **NCSAM Cyber Smart Quiz** at **Edelweiss Life**, scoring **100%** marks

CERTIFICATIONS

• **Sequence** Models | **~37 hours** | Certificate Link **Apr 2026**
• Algorithms for **DNA Sequencing** | **~12** hours | Certificate Link **Apr 2026**
• **Object-Oriented** Data Structures in **C++** | **~21** hours | Certificate Link **Jul 2024 - Aug 2024**
